

ECONOMICS PAPER 2
(Mock Test 32)
Question-Answer Book

Time allowed: 2 hours 30 minutes
This paper must be answered in English

INSTRUCTIONS

- (1) After the announcement of the start of the examination, you should first write your Candidate Number in the space provided on Page 1 and stick barcode labels in the spaces provided on Pages 1, 3, 5, 7, 9, 11, 13, 15, 17, 19 and 21.
- (2) This paper consists of two sections, A and B. Answer ALL questions in sections A and B.
- (3) Write your answers in the space provided in this Question-Answer Book. Do not write in the margins. Answers written in the margins will not be marked.
- (4) Supplementary answer sheets will be supplied on request. Write your candidate number, mark the question number box and stick a barcode label on each sheet, and fasten them with string **INSIDE** this book.
- (5) No extra time will be given to candidates for sticking on the barcode labels or filling in the question number boxes after the ‘Time is up’ announcement.

Please stick the barcode label here.

Section A (50 marks)

1. Kylie works in a fast food shop. She is considering whether to go to work or to visit a food fair on Saturday. Due to the large number of people visiting the food fair, people need to queue up for admission.

Explain how Kylie's opportunity cost of visiting the food fair will change if

- (a) the fast food shop raises the hourly rate on weekends by \$20. (2 marks)
- (b) fewer people visit the food fair due to bad weather. (3 marks)

2. (a) To which type of production does fishing belong? Explain. (2 marks)
- (b) Fishing generally involves people with different skill sets, including captains, crew and workers handling fish. What economic principle is illustrated by the above phenomenon? Suggest **THREE** reasons why the application of this principle can increase labour productivity. (4 marks)
- (c) State **ONE** example of variable cost incurred in fishing. Explain your answer. (2 marks)

3. Refer to the following table.

	Per capita real GDP	Gini coefficient based on original household income	Gini coefficient based on post-tax household income
Country A	\$50,000	0.52	0.44
Country B	\$45,000	0.48	0.46

- (a) Give **TWO** reasons why the standard of living of people in Country A is not necessarily higher than that of people in Country B. (2 marks)
- (b) Explain which country's tax policies are more effective in reducing income inequality. (2 marks)

5. The table below shows the changes in the GDP deflator of a country.

Year	Year-on-year growth rate of GDP deflator
2020	+2.6%
2021	+1.9%
2022	+1.1%

- (a) Explain whether inflation occurred in the country during the above period. (2 marks)
- (b) 'The real wage of workers in the country must have decreased during the above period.' Do you agree? Explain your answer. (3 marks)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

6. Lithium is a metal that is used to make batteries for electric vehicles. Suppose the price of lithium in Country A decreases sharply.
- (a) (i) With the aid of a diagram, explain how a sharp decrease in the price of lithium in Country A will affect the total social surplus in the market of electric vehicle batteries in Country A. (4 marks)
- (ii) Explain whether the above change in the price of lithium would improve or worsen economic efficiency. (2 marks)
- (b) Due to the increasing demand for electric vehicles in Country A, more electric vehicle manufacturers decide to open factories in Country A. Explain which function of price is illustrated in this case. (2 marks)

7. The table below shows the items of the balance of payments of Country A in 2022.

	Debit (\$ million)	Credit (\$ million)
Domestic exports of goods		50
Re-exports of goods		15
Imports of goods	20	
Exports of services		45
Imports of services	48	
Capital inflow		30
Capital outflow	52	
Reserves assets	20	
Total	140	140

- (a) Calculate the current account balance of Country A. (1 mark)
- (b) Explain whether the balance of payments of Country A was in deficit or surplus in 2022. (2 marks)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

8. The table below shows the production and consumption data of Country A. The country only produces and consumes rice and clothing.

	Rice (units)	AND	Clothing (units)
Total production without trade	20	AND	40
Total production with specialisation	50	AND	0
Total consumption with trade	30	AND	50

- (a) Calculate the opportunity cost of producing 1 unit of clothing for Country A. (2 marks)
- (b) Find the terms of trade for 1 unit of clothing. (2 marks)
- (c) Country B is the only trading partner of Country A. Assume that the opportunity cost of producing 1 unit of clothing in Country B is 0.25 units of rice. The transportation cost of trading 1 unit of clothing is 0.1 units of rice, and the transportation cost is borne by the exporting country. Calculate the total gain from trade for Country B from exporting clothing. (2 marks)

9. The table below shows the balance sheet of a banking system. Suppose the public hold \$500 million cash and the banks hold \$250 million excess reserves.

Assets (\$ million)		Liabilities (\$ million)	
Reserves	2,500	Deposits	9,000
Loans	6,500		

- (a) Calculate the required reserve ratio of the banking system. (1 mark)

Suppose the public want to hold \$800 million cash and withdraw the desired amount from the banks.

- (b) (i) Explain whether the monetary base will change. (2 marks)
- (ii) Calculate the maximum possible amount of money supply. Show your working. (3 marks)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

END OF SECTION A

Answers written in the margins will not be marked.

Section B (70 marks)

10. A football club was acquired by an oil company.

- (a) Explain which type of expansion the above acquisition was. (2 marks)
- (b) List **TWO** possible reasons why the oil company chose to acquire a football club instead of another oil company. (2 marks)
- (c) In addition to the fixed weekly salary, some football players will also be paid bonuses according to the number of goals scored. From the viewpoint of football clubs, explain **TWO** advantages of using this wage payment method over time rate. (4 marks)
- (d) Some TV stations buy the rights to broadcast football matches and broadcast the matches to the public for free. Explain whether the TV broadcasts of the matches are free goods. (2 marks)
- (e) In reality, some football clubs are listed companies. State **ONE** advantage and **ONE** disadvantage of a football club being a listed company instead of a private limited company. (2 marks)

11. In June 2023, the South Korean government distributed a set of coupons for local accommodation and tour packages to boost domestic consumption.
- (a) When people purchased accommodation for a price exceeding 50,000 Korean won in any region in South Korea, a coupon of 30,000 Korean won would be given.
- Compared with directly distributing 30,000 Korean won to residents in cash, explain an advantage of the above arrangement for the economy of South Korea. (3 marks)
- Suppose South Korea initially has a deflationary (output) gap.
- (b) With the aid of a diagram, explain how the above action can help South Korea restore its aggregate output to the full-employment output level in the long run. (6 marks)
- (c) **WITHOUT** using a diagram, explain why even without the help of the government, market forces can restore South Korea's aggregate output to its full-employment output level in the long run. (4 marks)

12. With the advancement of communications technology, more and more companies are allowing their employees to work from home.
- An employee replies to customers' emails from his home computer. Explain which factor of production the computer belongs to. (2 marks)
 - A company decides to allow more employees to work from home in order to reduce the size of the office and save rental costs. Explain to what basic economic problem the company's decision is related. (2 marks)
 - As more companies allow their employees to work from home, the rents of commercial buildings decrease. However, the vacancy rate still increases. With the aid of Figure 1, explain the above phenomenon. (5 marks)

Figure 1: Leasing market for offices

- Suppose some banks decide to hold more excess reserves as they are worried that the high vacancy rate of commercial buildings will affect the solvency of developers. Explain how this will affect the deposit creation ability of the banking system in the economy. (2 marks)

13. Venice is a tourist destination in Italy. After the COVID-19 pandemic, countries have gradually lifted travel restrictions, and the number of tourists visiting Venice has increased.

- (a) Explain the effect of the change in the number of tourists on the current account in the balance of payments of Italy. (2 marks)

With a large number of tourists visiting Venice, some local residents complain about the noise from tourists.

- (b) (i) Explain how the visit of tourists to Venice may result in a divergence between private and social costs. (3 marks)

- (ii) In September 2023, Venice's city council announced that, starting from 2024, day-trip visitors visiting the city from 8:30 am until 4 pm on selected dates will be charged a 'city entry fee' of 5 euros each. Explain how the 'city entry fee' can help reduce this divergence? (2 marks)

- (c) A Venetian restaurant owner said, 'The tourism industry creates a lot of job opportunities for Venice, and the government should not impose an entry fee on tourists.' Explain whether the owner's statement is a positive statement. (2 marks)

- (d) Some people think that Venice should impose visitor limits on certain famous attractions. Other than the change in tourist numbers, suggest **ONE** economic phenomenon that may be observed as a result of implementing such limits. (1 mark)

14. The labour force in Hong Kong has been declining and the government has introduced measures to alleviate the shortage of labour in many industries.

Source A: Hong Kong's labour force by educational attainment

(Source: Census and Statistics Department, HKSAR Government)

Source B: Information about the government's introduction of the labour importation schemes for the construction and transport sectors and the enhancement of the existing Supplementary Labour Scheme

Labour importation schemes for construction and transport sectors	Enhancement of the existing Supplementary Labour Scheme
- Subject to fulfilment of the specified parameters, the sector-specific labour importation schemes would allow employers in the construction and transport sectors to apply for quotas for importation of labour. The total quota for the two sector-specific labour importation schemes is 20,000, comprising 1,700 for the public light bus/coach trade. - The wage levels of imported labour must be no lower than the median monthly wages of relevant posts in Hong Kong.	Under the existing scheme, there are 26 job categories and unskilled/low-skilled posts for which labour importation is not allowed. The 26 job categories include waiter/waitress, cashier and junior cook. After the plan is enhanced, the above exclusion will be suspended for 2 years. The Supplementary Labour Scheme will be renamed as the Enhanced Supplementary Labour Scheme.

(Source: Various newspapers)

Answers written in the margins will not be marked.

Please stick the barcode label here.

Source C: Information about the Enhanced Supplementary Labour Scheme

According to the scheme, employers with genuine difficulties in recruiting suitable staff locally may apply for importation of workers at technician level or below. The employer is required to enter into a Standard Employment Contract with the imported worker of which the maximum contract period is two years. After entry, the imported worker must remain under the direct employment of the same employer for the specified job and in the specific workplace(s) as stipulated in the Standard Employment Contract. Change of employer, post or job duties is not permitted. The imported worker is required to return to his/her place of origin on completion of his/her employment contract.

Source D: Some views on labour importation

 A restaurant owner	The labour scheme introduced by the government has made it easier for my restaurant to hire suitable staff.
 A minibus driver	Raising the minimum wage for minibus drivers is more likely to attract people to enter the industry than importing labour.

- (a) Refer to Source A. Explain the effect of the change in labour force in Hong Kong from 2019 to 2022 on aggregate output in the long run. (2 marks)
- (b) Refer to Source B. Explain how the labour importation schemes for construction and transport sectors will affect the mobility of **overseas workers**. (2 marks)
- (c) Refer to Source C. Explain respectively, whether the income of overseas workers under the Enhanced Supplementary Labour Scheme would be included in the calculation of Hong Kong's gross domestic product (GDP) and gross national income (GNI). (4 marks)
- (d) Refer to Source B and the view of the restaurant owner in Source D. Explain how the labour importation scheme introduced by the government will affect the price elasticity of supply for catering service. (2 marks)

Answers written in the margins will not be marked.

For part (e), candidates are required to present their answer in essay form. Criteria for marking will include use of sources and economic theories, relevant content, logical presentation and clarity of expression.

(e) Suppose the government has two strategies to alleviate the problem of labour shortage.

- Proposal I: Increasing the maximum amount of monthly allowance for trainees attending courses of the Employees Retraining Board (ERB)
- Proposal II: Raising the minimum wage rate of specific sectors which have a labour shortage

With reference to the above sources and your own knowledge in Economics, discuss the effects of each strategy on the following variables in order to **evaluate** the two proposals.

- average labour productivity
- number of employed persons
- aggregate output
